

## How to add the Windsor SIR website to your phone

You might find it convenient to have a shortcut to the Windsor SIR website on your phone. You can add the Home page or specific pages such as Calendar or Members to get to them quickly.

### Select the page you want a shortcut to

Use the camera on your phone to scan any or all the QR codes below for the page you want a shortcut for. If you want a page that doesn't have a QR code below, just go to the Home page and use the menu to get to that page.

## How to add the page to your phone

### Android

Chrome Browser: With the page you want to create a shortcut for open, click the three dots on the screen and scroll down to “Add to Home screen” and tap it. On the “install App” screen that appears you can edit the name such as Sirs, Calendar or Members. After editing click on Install. Select Add to Home Screen. Find the icon for the link and drag it to your home screen or whichever screen you want it to show on and release. You can now just tap that icon to go to that page immediately.

Brave Browser: With the page you want to create a shortcut for open, click the three dots on the screen and scroll down to “Add to Home screen” and tap it. On the “install App” screen that appears you can edit the name such as Sirs, Calendar or Members. After editing click on add. Then click on “Add to home screen.” This will place the icon on one of your pages. To move it to a different location, hold the icon and drag it to the position you want. You can now just tap that icon to go to that page immediately.

### iPhone

With the page you want to create a shortcut for open, click on the Share icon  at the bottom of the screen. Depending on the OS version you have the procedure may vary. There may be additional steps to take. Scroll down to find “Add to Home screen” and click it. Give it a name such as members or calendar. This will add an icon to the desktop. You can hold and drag the icon to a location of your choice. Just tap the icon to be taken to the selected page.
